COMPARISION BETWEEN DIFFERENT PROCESS:

DEFAULT

My default is "DEFAULT".It is round robin and Once a process is executed for a given time period, it is preempted and other process executes for a given time period. The screenshots of processes info when DEFAULT is used .

Here two process can run alternatively

FCFS:

Processes are executed on first come, first serve basis.Other processes need to wait until the processes which are created before it are done
AT max 2 process can run.

PBS:

A priority-based scheduler selects the process with the highest priority for execution.Until

the processes of higher priority are done lower priority are not done. The screenshots of processes info when PBS is used:

Lower priority one is running.and other process wait until least priority is executes
